SUMMARY

DevOps Engineer with 4.9+ years of experience in designing, automating and managing scalable cloud and on-premises infrastructure for telecom environments. Experienced in building and maintaining CI/CD pipelines, Infrastructure as Code (IaC), containerized applications, and Kubernetes orchestration to enable reliable and automated software delivery. Hands-on expertise in AWS Cloud, Docker, Kubernetes, Terraform, Ansible, Jenkins, Git and Linux Administration, with strong knowledge of cloud migration, infrastructure automation, monitoring, production support, and incident management. Proven success in reducing deployment time by 40%, automating infrastructure across 10,000+ production nodes, and supporting mission-critical 5G Network Functions (CNFs) with high availability and operational reliability.

TECHNICAL SKILLS

- **DevOps & CI/CD:** Jenkins, Git, GitHub, Phabricator, AWS CodeCommit, AWS CodeBuild, AWS CodeDeploy and AWS CodePipeline
- **Cloud Platforms:** Amazon Web Services (AWS), Google Cloud Platform (GCP)
- **AWS Services:** EC2, CloudWatch, IAM, S3, VPC, ECR, ECS, CodeCommit, CodeBuild, CodeDeploy, CodePipeline, RDS.
- **Containerization & Orchestration:** Docker, Kubernetes, Docker Swarm
- **Infrastructure as Code:** Terraform and Ansible
- **Monitoring & Logging:** Prometheus, Grafana and AWS CloudWatch
- **Operating Systems:** Linux, Windows
- **Scripting:** Bash and Shell Scripting
- **Networking:** NFV, Wireshark, TCP/IP, HTTP/HTTPS and DNS
- **Tools:** Artifactory, Postman, OS Ticket

PROFESSIONAL EXPERIENCE

DevOps Engineer – Deputy Manager

Reliance Jio Infocomm Limited, Navi Mumbai

Nov 2021 – Present

Key Responsibilities & Achievements

- Collaborate with cross-functional development, QA, and operations teams to deliver highly available and scalable applications through automated DevOps practices.
- Design, implement, and maintain CI/CD pipelines using Jenkins, Git, Ansible, and Artifactory, automating build, testing, and deployment processes for 20+ microservices.
- Reduced deployment time by 40% by automating software delivery pipelines and eliminating manual deployment activities.
- Deploy and manage containerized 5G Network Functions (CNFs) using Kubernetes, ensuring scalable, fault-tolerant, and highly available production environments.
- Design and maintain Docker Swarm clusters for containerized microservices while troubleshooting node failures and optimizing cluster performance.
- Build, optimize, and maintain Docker images for multiple microservices and manage container lifecycle, networking, and persistent storage.
- Develop and execute Ansible playbooks to automate production readiness validation, server configuration, and health checks across 10,000+ production nodes.
- Provision and manage cloud infrastructure using Terraform, supporting Infrastructure as Code (IaC) and cloud automation initiatives.

- Participate in cloud migration projects involving migration of containerized workloads from on-premises infrastructure to AWS.
- Configure and maintain Prometheus and Grafana dashboards to monitor infrastructure health, application performance, resource utilization, and alerting.
- Perform production deployments, application validation, API testing, and release verification across GCP, IoT, and production environments.
- Troubleshoot infrastructure, application, networking, and deployment issues while supporting business-critical telecom services.
- Participate in incident management, root cause analysis (RCA), production support, and continuous service improvement activities.
- Work in Agile environments collaborating with development teams to improve deployment reliability and operational efficiency.

KEY DEVOPS PROJECTS

1. CI/CD Pipeline Automation for 5G Network Functions

Technologies: Jenkins, Ansible, Git, Artifactory, Docker

- Designed and implemented end-to-end CI/CD pipelines for containerized microservices.
- Automated build, deployment, and configuration management processes.
- Reduced deployment time by 40%.
- Improved deployment consistency and minimized manual intervention.
- Integrated artifact versioning using Artifactory and Automated deployment for 20+ microservices.

2. Kubernetes Deployment & Container Orchestration

Technologies: Kubernetes, Docker, YAML

- Deployed and managed containerized 5G Network Functions using Kubernetes.
- Created Kubernetes deployment manifests and service configurations.
- Managed rolling deployments and application scalability.
- Improved application availability through container orchestration.
- Optimized cluster resource utilization.

3. AWS Cloud Migration & Infrastructure Automation

Technologies: AWS, Docker, Terraform

- Participating in migration of microservices from on-premises infrastructure to AWS and Building containerized workloads for cloud deployment.
- Provisioning AWS infrastructure using Terraform.
- Supporting deployment automation across AWS environments.
- Assisting in integrating CI/CD pipelines with AWS infrastructure.
- Ensuring high availability and scalability of cloud-hosted applications.

4. Infrastructure Automation Using Ansible

Technologies: Ansible, Linux

- Developed Ansible playbooks to automate production health checks across 10,000+ servers and Automated server validation before production deployments.
- Reduced manual operational effort by 30%.
- Improved deployment reliability and infrastructure consistency.
- Integrated automation with monitoring and reporting systems.

CERTIFICATIONS

- Ultimate AWS Certified Solutions Architect Associate 2026
- Kubernetes Fundamentals

EDUCATION

B.E IN ELECTRONICS AND TELECOMMUNICATION

Atharva College of Engineering | 2017 – 2020 | CGPI: 8.56

DIPLOMA IN DIGITAL ELECTRONICS

Shri Bhagubhai Mafatlal Polytechnic | 2013 – 2017 | 86.87 %

SECONDARY SCHOOL CERTIFICATE (SSC)

Sheth D.M. High School | 2013 | 91.45%

INTERNSHIP

TRAINEE

Larsen & Toubro Limited | 12/2016-06/2017

TRAINEE

N.M. Automation & Control Private limited | 06/2015-12/2015
