SUMMARY

DevOps Engineer with **4.3 years of experience** in designing, automating, and optimizing cloud and on-premise infrastructure. Skilled in **Docker, Jenkins, Ansible, Git, Kubernetes and AWS** with strong experience in CI/CD pipeline automation and container orchestration. Proven ability to improve deployment efficiency, **reduce deployment time by 40%**, and manage large-scale **5G network infrastructure** at Reliance Jio. Experienced in monitoring, troubleshooting, and delivering highly available and scalable systems.

TECHNICAL SKILLS

- **CI/CD & Automation:** Jenkins, Ansible, Git, Phabricator
- **Containerization & Orchestration:** Docker, Kubernetes, Docker Swarm, OpenShift
- **Cloud Platforms:** AWS(EC2, CloudWatch, IAM, S3, VPC, ECR, ECS, CodeCommit, CodeDeploy, CodPipeline, RDS) and GCP.
- **Monitoring & Logging:** Prometheus, Grafana
- **Networking:** NFV, Wireshark
- **Scripting & OS:** Bash, Linux, Windows
- **Tools:** Artifactory, Postman, OS Ticket

EXPERIENCE

DEVOPS ENGINEER - DEPUTY MANAGER

Reliance Jio Infocomm Limited, Navi Mumbai

Nov 2021 – Present

- Collaborate with cross-functional teams to ensure reliable and scalable deployments on the **JIO MANO orchestration platform**.
- Designed, deployed, and maintained **Docker Swarm clusters**, troubleshooting node failures using system logs and Wireshark analysis.
- Automated **CI/CD pipelines for 20+ microservices** using Jenkins and Ansible across RHEL virtual machines, reducing deployment time by **40%**.
- Deployed and managed **5G Network Functions using Kubernetes**, utilizing YAML manifests for scalable and fault-tolerant deployments.
- Executed **Ansible playbooks across 10,000+ nodes** to perform production readiness checks and pre-deployment validation.
- Implemented **Prometheus and Grafana monitoring solutions** for real-time metrics, alerting, and system performance visibility.
- Independently managed **end-to-end project lifecycle** across GCP, IoT, and production environments, including deployment validation, application testing, and API verification.
- Built and managed **Docker images for microservice-based applications**, including volume management and container orchestration within Docker Swarm clusters.
- Supported troubleshooting, incident resolution, and operational stability for large-scale telecom infrastructure environments.

PROJECTS

1. CI/CD Pipeline Automation for 5G Network Functions

- Designed and implemented **CI/CD pipelines using Jenkins and Ansible** integrating build, test, and deployment stages for **20+ microservices**.
- Reduced deployment time by **40%** and minimized manual configuration errors.
- Integrated **Git, Artifactory, and Phabricator** for version control, Artifact storage, and code review workflows.

2. Kubernetes Deployment and Scaling for Network Functions

- Designed and deployed **Kubernetes YAML manifests** to orchestrate containerized 5G network functions.
- Optimized cluster resource utilization and implemented **auto-scaling policies** to ensure high availability and reliability.

3. Cloud Infrastructure Setup and Migration to AWS

- Currently involved in **migrating microservices-based applications from on-premises infrastructure to AWS cloud** using containerized environments.
- Building and testing **Docker-based application environments** to ensure portability across on-premise and cloud infrastructure.
- Supporting deployment of containerized microservices on AWS environments while ensuring **high availability, scalability, and optimized resource utilization**.
- Assisting in integrating **CI/CD pipelines with AWS infrastructure** to enable automated build, containerization, and deployment of microservices.

4. Ansible Automation for Production Health Checks

- Developed **Ansible playbooks** to automate daily production health checks across **10,000+ nodes**.
- Automated server status reporting and integrated alerts with monitoring tools.
- Improved system reliability and **reduced manual operational workload by 30%.**

INTERNSHIP

TRAINEE
Larsen & Toubro Limited | 12/2016-06/2017

TRAINEE
N.M. Automation & Control Private limited | 06/2015-12/2015

EDUCATION

B.E IN ELECTRONICS AND TELECOMMUNICATION
Atharva College of Engineering | 2017 - 2020
CGPI: 8.56

DIPLOMA IN DIGITAL ELECTRONICS
Shri Bhagubhai Mafatlal Polytechnic | 2013 - 2017
86.87%

SECONDARY SCHOOL CERTIFICATE (SSC)
Sheth D.M. High School | 2013
91.45%

CERTIFICATIONS

- AWS Cloud Technical Essentials
- Kubernetes Fundamentals
